Ireland America Science Forum Board President Dr. Deborah Brosnan Addresses Distinguished Scientists, Business Leaders, and Irish Ambassador Daniel Mulhall at the Forum's Fall Reception

WASHINGTON, D.C. - This week, the Ireland American Science Forum hosted an ideas-gathering event with Irish and Irish American scientists and professionals at the Cosmos Club in Washington, D.C.

IASF Board Chair and President Dr. Deborah Brosnan addressed the distinguished scientists, academics, business leaders, and public officials – including Irish Ambassador Daniel Mulhall, on the importance of the IASF's mission: to bring together people who wouldn't otherwise have met to explore and make discoveries that they never would have done alone. She offered a special thanks to Irish Ambassador Mulhall for his support, to IASF's inspiring Board members, and to all who participated in a great evening.

The Ireland America Science Forum seeks to forge links between Ireland and America in science and technology and welcomes all who are interested in participating in the mission. It can be reached at irelandamericascienceforum@gmail.com.
